

DAMIEN MCCULLOR

Kapolei, HI | (252) 414-0846 | damien.mccullor@yahoo.com | linkedin.com/in/damien-mccullor

PROFESSIONAL PROFILE

Full Stack Software Engineer and **Cybersecurity** professional with a strong foundation in cross-platform mobile and web applications, REST API architecture, and database design. Combines 22 years of disciplined military operational leadership with expertise in JavaScript, React Native, Java Spring Boot, and Node.js to build scalable, secure, and production-ready applications.

CORE COMPETENCIES & TECHNICAL SKILLS

FRONTEND DEVELOPMENT	BACKEND & DATABASE	TOOLS, SECURITY & CLOUD
- JavaScript (ES6+) - React / React Native - Expo SDK & Router - HTML5 & CSS3 - Tailwind CSS / UI Frameworks - Responsive Web Design - Redux State Management	- Node.js & Express - Java 17 & Spring Boot - Python (Flask / APIs) - RESTful API Design - SQL (MySQL, PostgreSQL) - MongoDB & Supabase - JPA / Hibernate ORM	- Git / GitHub / Version Control - VS Code & DBeaver - AWS Cloud Concepts - Cybersecurity Compliance - Automated Testing (Selenium) - JUnit 5 & MockMvc - CI/CD (GitHub Actions)

Technical Tools & Technologies: VS Code · Git · GitHub · React Native · Node.js · Java Spring Boot · Postman · MySQL Workbench · DBeaver · Selenium · AWS

TECHNICAL PROJECTS

Rocket Food Delivery — Customer & Courier Mobile App

React Native / Expo SDK / Java Spring Boot REST API

- Architected a cross-platform mobile food delivery application using React Native and Expo SDK (~55) connected to a Java Spring Boot backend REST API.
- Implemented token-based authentication with persistent JWT storage via AsyncStorage and configured custom brand typography.
- Designed dynamic customer ordering workflows with stepper quantity controls, real-time order confirmation modals, and SMS/Email notification opt-ins.
- Developed dual-role session routing for user accounts and dedicated courier delivery management views with strict order state transition locks.

Rocket Food Delivery — Enterprise REST API & Back-Office

Java 17 / Spring Boot / MySQL / Hibernate

- Architected an enterprise back-office management system using Java 17, Spring Boot, MySQL, and Thymeleaf across a 9-table relational database.
- Engineered an enterprise REST API following strict Test-Driven Development (TDD) using JUnit 5, MockMvc, and Postman API testing suites.
- Secured backend operations with parameterized native SQL queries to eliminate SQL injection vulnerabilities and decoupled domain logic into dedicated service layers.

CodeBlogs — Developer Platform & DevOps Suite

MERN Stack (MongoDB, Express, React, Node.js) / Selenium / Lighthouse

- Collaborated in an Agile two-person engineering team to build a developer social platform using MongoDB Atlas, Express, React, Node.js, and Redux-Thunk.
- Executed DevOps quality auditing using Google Lighthouse to refactor performance, accessibility, and SEO metrics.
- Automated end-to-end browser regression testing by authoring a comprehensive test suite using Selenium IDE.

WORK EXPERIENCE

Lead Simulation Supervisor / Battle Director

Mar 2015 — Apr 2024

Hawaii Air National Guard

- Led technical data synthesis efforts for mission post-analysis, automating manual tasks to achieve a **15% improvement** in operational reporting efficiency.
- Managed complex system architectures and enforced strict cybersecurity compliance across classified networks and data feeds.
- Mentored 30+ technical personnel in system workflows, troubleshooting, and operational execution under high-pressure scenarios.

Operations Specialist

Jun 2000 — Mar 2013

United States Navy — Multiple Duty Stations

- Analyzed real-time radar data for 500+ contacts per watch cycle, maintaining strict database entry integrity and reducing processing errors by **8%**.
- Maintained mission-critical relational system records, ensuring uninterrupted data accuracy for tactical decision support.

CERTIFICATIONS & TRAINING

Full Stack Web & Mobile Development Training (In Progress) — Codeboxx | 2026

PCAP — Certified Associate in Python Programming (Course & Exam Completed) — Cisco Networking Academy / Python Institute Partner | 2025

AWS Cloud Practitioner Training — Certificate of Completion | 2025

PCEP — Certified Entry-Level Python Programmer — Python Institute | 2025

PCAD — Python Certification for Data Analytics — Cisco Networking Academy | 2025

EDUCATION

Candidate for Bachelor of Science in Cybersecurity — Wayland Baptist University | Expected May 2027 (Status: Junior)
